Asphalt POI

I.   Background

Some of the POI has been summarized as only able to handle Asphalt, while they might be able to carry other commodities such as D, G, F and so on. We need to do some research online and check with the record in our database to add the additional commodities for those POI.

II.   The SQL queries below are used for this task:

```
select
a.poi,
c.type,
sum((case when a.draught_arrive > a.draught_depart then 1 else 0 end)) as Unloads,
sum((case when a.draught_depart > a.draught_arrive then 1 else 0 end)) as Loads
from
asvt_arrival a join as_vessel_exp b
on a.vessel = b.vessel
join tanker c
on b.imo = c.imo
where
a.poi in (17871)
group by 1,2
order by 1,3 descselect * from importer_parent where code = 'CH436';
select * from lookup.cmdty;
select * from cat_product where cd_name ilike '%Grease%'
select * from tanker
```

III.   Update POI

1. Enter a POI to "Edit"
2. Cmdty: type in the new commodities, then click on "Submit"
   Barge*: (all) N
   Cmdty*: type in all commodity
   DateStart: copy the first date for all empty 01/01/00, then click on "Submit"
